## INTERNATIONAL MEAT TRADE: CONTINUING TRENDS

Dramatic shifts that occurred in world meat trade patterns during 1964 were largely continued throughout 1965. World exports of all red meats in 1965 amounted to 8,862 million pounds (carcass weight equivalent basis, excluding fats, offals and live animals)--up 2 percent from the previous year's reduced level but, still, 4 percent below 1963's all-time export high. Last year's modest increase reflects substantially heavier world exports of pork (nearly 18 percent more than in 1964) which more than offset reduced shipments of beef and veal (about 5 percent less than in 1964); the combined world exports of mutton, lamb, goat meat and horse meat were only slightly under 1964's level.

World trade in red meats last year was comprised of beef and veal (nearly 50 percent of total exports), pork (34 percent), mutton, lamb and goat meat (14 percent), and horse meat (2 percent).

Beef and Veal. The bulk of beef and veal moving in foreign trade is from surplus producing countries in South America and Oceania, to deficit producing parts of Europe and North America.

In 1965, the world's leading exporters of beef and veal were Australia (accounting for 25 percent of total world exports), Argentina (21 percent), New Zealand (8 percent), and Uruguay (5 percent). Top-ranking importers were the United States (accounting for 22 percent of total world imports), United Kingdom (22 percent), Italy (14 percent), and West Germany (9 percent).

Exports of beef and veal last year amounted to 4,367 million pounds--down 5 percent from 1964's already reduced level.

Argentina declined slightly from its long-standing first-place position among the world's leading beef exporters, shipping only 933 million pounds in 1965--off 22 percent from the previous year. After-effects of 1963's drought-induced record heavy slaughter were still being felt. Uruguay too, exported considerably less--down 32 percent--last year than in 1964 (224 million pounds in 1965 compared with 331 million in the previous year).

New Zealand shipped 12 percent less--354 million pounds compared with 404 million in 1964; herd rebuilding and reduced cow slaughter resulted in smaller output and export availabilities.

Australia became number one among the world's major beef exporters. Shipments totaled 1,103 million pounds--up 12 percent from 1964 and fully double the average amounts exported during 1956-60.

On the import side, the United States--world's leading beef producer with about a third of the global total in recent years--maintained top-ranking position as the world's foremost purchaser of beef even though imports have been declining since 1963.

In 1965, U.S. imports of beef totaled 942 million pounds (carcass weight basis)--down 13 percent from 1964's already reduced level. Imports into the United Kingdom--at 934 million pounds last year--were off 18 percent from the high levels of other recent years. Italy's beef imports--at 575 million pounds--were 12 percent below 1964's alltime high. West Germany imported a record 361 million pounds in 1965--up 23 percent from the previous year's already high level.

In brief, world beef trends that emerged in 1964 were largely continued throughout most of 1965. Demand for beef still outpaced supply availabilities. Strong prices were sustained. Beef from Australia and New Zealand continued to move into West European markets to supplement reduced shipments from Argentina and Uruguay. The United States imported considerably less than in recent years.

Pork. In 1965, world pork exports increased 18 percent over the previous year and were 58 percent above 1956-60 average levels. This situation reflects considerably larger movements of pork within Europe, where the bulk of the trade is traditionally done. In 1965, Europe accounted for 94 percent of total world exports of pork and 90 percent of total world imports of pork.

Denmark is the world's leading exporter of pork shipping 1,290 million pounds in 1965--up 13 percent from 1964's already high level. The second largest world pork exporter is the Netherlands with 425 million pounds in 1965--also, up 13 percent from 376 million pounds in 1964. In each case, pork exports have increased steadily since 1960.

The unrivaled, top-ranking importer of pork is the United Kingdom. In 1965, the U.K. imported 1,440 million pounds of pork products--3 percent above 1964. The United Kingdom accounted for 53 percent of total world pork imports in 1965.

The United States is both an importer and an exporter of pork, but is generally a net importer. In 1965, U.S. pork imports amounted to 333 million pounds (up 25 percent from 1964) while exports totaled 55 million pounds (down 60 percent from 1964). Accounting for this shift were reduced slaughter supplies and high pork prices in the United States.

Mutton and Lamb. World trade in mutton and lamb showed no material change in 1965. Total exports amounted to 1,282 million pounds compared with 1,288 million pounds in 1964.

The world's leading exporter of mutton and lamb is New Zealand--shipping 759 million pounds, or 59 percent of the world total in 1965. This figure was 9 percent below the previous year, reflecting reduced slaughter following 1964's drought-stimulated heavier-than-usual slaughter.

Australia is the world's second largest exporter of mutton and lamb; exports--at 354 million pounds in 1965--were up 8 percent from 1964.

The world's leading importer of mutton and lamb is the United Kingdom taking 792 million pounds in 1965--up slightly from the previous year.
